🌐 LeetCode — GeeksforGeeks

Objective

- Aspiring backend developer with a strong foundation in **Java**, **Spring Boot**, and conversational AI. Passionate about building scalable systems and intelligent automation such as chatbots. Seeking an opportunity to contribute to impactful software solutions and grow in a dynamic environment.

Education

St. Andrews Institute of Technology & Management

2021 – 2025

B.Tech in Computer Science, CGPA: 7.5

Gurugram, India

XII, CBSE

2018 – 2020

Percentage: 70%

Skills

- Languages:** Java, SQL, JavaScript
- Backend:** Spring Boot, REST APIs, Microservices, Spring Security, Redis
- Database:** MySQL
- Tools:** Git, Docker, AWS (basic), Postman, JIRA, CI/CD (Jenkins, GitHub Actions)
- Core:** Data Structures & Algorithms (370+ problems solved)

Professional Experience

Jarurat Care Foundation

June 2025 – October 2025

Software Developer Intern (Chatbot Development)

Remote

- Developed a WhatsApp-based chatbot using **Java Spring Boot** to assist cancer patients with personalized care resources.
- Implemented modules for **Nearby Hospitals**, **Nutrition Plans**, **Emotional Support**, and **Financial Guidance**.
- Integrated multilingual interaction (English/Hindi), consent-based data collection, and escalation to live volunteers.
- Designed structured conversation flows ensuring privacy compliance and automated daily check-ins.

HULK HIRE TECH

May 2025 – July 2025

Software Developer Intern

Gurugram, India

- Developed REST APIs for PayPal Standard Checkout in a microservices setup on **AWS**.
- Integrated order management, payment tracking, and **OAuth 2.0** security.
- Implemented **Redis caching** and Spring Scheduler for token and task management.
- Focused on modular design, REST standards, and efficient debugging.

Projects

Spring Boot Authentication Service (JWT + Redis + CI) Spring Boot, Spring Security, JWT, Redis, MySQL, JUnit

- Built JWT-based authentication with stateless security and role-based access (USER / ADMIN).
- Implemented Redis rate limiting (IP + endpoint) to prevent brute-force attacks on auth APIs.
- Developed custom security filters (JWT + RateLimit) in Spring Security filter chain.
- Added audit logging for login attempts, failures, and rate-limit violations.
- Wrote unit filter tests using JUnit, Mockito, MockMvc; integrated Jenkins CI.

URL Shortener Service

Spring Boot, Redis, MySQL, JPA, Swagger

- Designed and built a production-grade URL shortener using Base62 encoding with root-level redirection.
- Implemented Redis caching with TTL aligned to URL expiry, optimizing hot-path performance and reducing DB load.
- Developed IP-based rate limiting to prevent abuse and ensure API reliability.
- Added click count analytics with consistent write strategy and expiry validation.
- Structured the application using clean layered architecture (Controller, Service, Repository) and documented APIs with Swagger.
